What you Can't See CAN Hurt you

» Laundry detergents don't kill germs

EcoWasher® eliminates 100% E. coli and other bacteria and viruses that fester in every load of laundry.

Many home washing machines in the United States contain **deadly and dangerous bacteria**. Most home laundry cycles don't create a high enough temperature in order to sterilize laundry. Whatever germs go into the washing machine **stay and fester**, causing a nasty smell. Not only are clothes still

contaminated after they have been washed, but they might actually contain *more* germs and toxins because of unseen **gunk**. This results in exposure to harmful chemicals on your skin due to detergent residue.

Laundry Truths
BACTERIA
E. Coli

Did you know that there are an estimated **100 million E. Coli bacteria** in each load of laundry you do?

E. Coli is often associated with fecal matter.

What's Lurking in your Wash Wheel?

» E. Coli, Staph, Salmonella...

EcoWasher® attacks the gunk you can't see for a clean, sanitized washing machine.

There are **millions of germs** left behind in your wash wheel. The gunk, due to detergent residue, is a reservoir of bacteria. This gunk continues to be picked up and deposited throughout the laundry cycle.

Your entire family could be exposed to the norovirus, often confused with stomach flu, through the sick laundry cycle.

Because EcoWasher® requires **no detergent**, there will be **no gunk build-up**. This can dramatically extend the life of the washer.

This gunk is **so toxic** that it has the ability to **corrode** through a metal wash wheel, resulting in unnecessary repairs and premature wearing of the washing machine.

If you knew that this was in your clothing, would you still wear it?

An EcoWasher® user took his detergent-washed laundry and washed it again with EcoWasher®. The result was **gunk-filled** rinse water, proving that toxic detergent is **left behind to be absorbed through your skin**.

Laundry Truths THE GUNK What causes it?

Toxic detergent build-up causes bacteria, viruses and scum to stay in the washing machine, even if it can't be seen.

This can cause dry, itchy skin, and irritate those with sensitivities, chemical allergies and skin issues.

Make the Switch 

Is Your Family Safe Using Detergent?

» Is your laundry making them sick?

EcoWasher® requires no detergent, therefore eliminating potential harm.

The textile industry uses processes that leave chemicals on clothing that are endocrine disruptors. These chemicals are also used in your detergent. An endocrine disruptor inhibits natural hormones in the body.

Residual detergent may be left in your family's clothing and absorbed through their skin. Some may even cause cancer, infertility and organ failure.

These poisons are absorbed into your skin, contaminate your washing machine and waste water, then seep into our environment and water supplies.

Europe has **banned** these poisonous ingredients used in the U.S.A. Even water treatment plants are unable to remove them.

[LEARN MORE](#)

The skin is the largest organ of the body. Toxins left in clothing have the ability to seep into the blood stream through your skin.

Laundry Truths

WHAT'S IN YOUR DETERGENT?

Stop Using Chemicals

Alarminglly, many poisons found in laundry detergents disturb the natural chemical processes and development of the body which can lead to an array of health problems.

The Obvious Dangers of Detergent

» Imagine what is not reported

Childhood exposure to detergents as reported by poison control centers.

Children have an attraction to small, bright objects. Between January 1, 2015 and October 31, 2015, **10,497 children** ages five and under have been exposed to laundry packets. These poisonous detergent vessels are so concentrated that many children have been hospitalized after consumption.

If this poison makes children so violently ill, imagine what it might do over time being absorbed into your skin.

Laundry Truths **HIDDEN INGREDIENTS**

Poisonous Chemicals

Detergent fragrances composed of phthalates may be dangerous to children. It may also lead to infertility, ADHD, diabetes, and thyroid issues.

Detergent manufacturers are not required to disclose the ingredients within the product.

Now that you know the ill effects...

» Would you wash your face with **E. coli** infested towels?

EcoWasher® eliminates the nasty bacteria that detergents actually perpetuate in the sick laundry cycle.

Imagine drying your face, your dishes, and your children with all the nasty bacteria and toxins **left behind** in your towels. Ever notice that pungent smell emanating from your towels? It's bacteria that cause the stink! **Detergent does not kill bacteria.**

With EcoWasher®, your towels will once again smell fresh and be bacteria and chemical-free. Most importantly, it disinfects your laundry. It's all done without detergent or hot water, saving your family **up to \$700 per year.**

Laundry Truths
**LOVE
YOUR SKIN?**

**Stop Using
Chemical
Additives**

Detergent dries out your laundry, forcing you to use fabric softener.

What do you think it does to your skin?

How Does EcoWasher® Work?

» The science behind EcoWasher®

1 The oxygen and PCO generators convert O_2 to O_3 to form powerful oxidation

2 EcoWasher® uses PCO and diffuses ozone into the cold water of the wash cycle.

3 Bacteria and other microbes in your laundry are eliminated by ozone.

4 The result is soft, clean, sanitized laundry without the use of toxic chemicals!

Interior of the EcoWasher®

The activated oxygen creates a powerful cleaning agent that flows directly into your washing machine.

Laundry Truths
SIMPLIFY
Easy to Use

EcoWasher® automatically produces nature's detergent every time you start a new wash. Just set for cold water and press start.

Consumer Reports

» **Thousands love it, you will too!**

"I love my EcoWasher and I installed it myself in 15 minutes. It is great with your clothes smelling so fresh, and how easy it is to load your clothes and not worry about chemicals in your clothes or next to your skin. What a great and simple way to go green and care for our clothes we wear every day and the environment we live in! Love it!"

-Carol Purser

"Love it!"

"...It sets my mind at ease..."

"I have granddaughters that have skin issues and it sets my mind at ease knowing that when I wash their clothes, there won't be any reactions from using all the chemicals found in washing detergents. I love not having to measure and pour detergents. My laundry room stays cleaner and less messy without all the cleaners sitting around!"

-Carla Hemphill

"...Odor free and clean..."

"...My husband works in construction so he really reeks when he comes home. He came home as usual after a hard day's work but had also been in lake water so he was fishy and muddy too. I knew this would be the true test so I washed a load of his clothes. I was so surprised at how well the clothes came out odor free and clean. It makes laundry day so easy by just throwing the clothes into the washer without adding detergent, fabric softener, bleach, or adjusting all the dials. I am absolutely sold on the EcoWasher. It's amazing!"

-Jennie Bright

"...Natural alternative..."

"It sounded too good to be true - to be able to have clean laundry without the use of detergents and chemicals. But, now I'm a believer. The laundry comes out fresh and clean. I would recommend the EcoWasher to anyone who is looking for a natural alternative to clean their laundry."

-Karen Dodovich
